

say Hello  
to the Flip Click Clock

## Simply lined and Intelligently made

Natural materials, Intelligent technology, Fine details.

The brand new Gingko **Flip Click Clock** is the 2<sup>nd</sup> generation from our 6 years best-selling Click Clock collection and it has kept the same sharp and clean lines design concept as our cube click clocks.

The Flip Click Clock is crafted with **natural wood material** and incorporated with our popular **sound activated** LED clock system , touch control top and the new **flip alarm technology**. It's designed to enhance your whole experience of day to day alarm clock use.

Small but smart, simple but clever .

## Accurately operated and Silently disappeared

The Flip Click Clock retains the same sound activated feature as our click clock range.

The display **automatically disappears** when it's quiet but still moves **perfectly accurate** every second. It lights up again when you give a gentle touch, or a cheerful clap, or **a magical click of your fingers**.

The Flip Click Clock only tells you the time now (12 or 24 hour format) and no longer alternates between date and temperature. However, this simplified display function has made it **super-easy** to set up.

## Responsibly tailored and Playfully performed

The Flip Click Clock is **tailored** to you.

The technologies built into the Flip Click Clock changes your normal way of using an alarm clock. When the Gingko Logo shows on top it means the alarm is off and when the nicely engraved alarm icon shows on top instead it means the alarm is turned on.

To set the time and alarm, simply touch the **fine laser engraved buttons**.

When the alarm goes off, gently '**stroke**' any of these engraved buttons on the top to snooze and to turn off the alarm, you can easily **flip it over** and the numbers will be **magically corrected to a normal display** as well, keeping the same time and moving as accurate as before.

Flip Click Clock, a design object tailored to be playful as well.

Ergonomically driven,  
and User-friendly designed,

The clean and clear touch buttons are beautifully engraved on the top of the Flip Click Clock. Touching the finely engraved natural wood buttons with your finger and setting up the Flip Click Clock can also be an enjoyable thing to do.

The removal of date and temperature displays makes the time and alarm **set up easier than ever**, just simply put your finger on the hour (HR) or minute (MIN) button to change the numbers, and touch time icon button to confirm, then the job is done.

Simplest ever alarm clock thanks to its **ergonomic and user-friendly** design.

## Efficiently powered and conveniently placed

The brand new Flip Click Clock is powered by an **integrated 2000mAh rechargeable battery** and battery life can last up to **more than 6 months** from one full charge when in sound activated display.

It's **fully portable** thanks to its rechargeable feature and that also makes it a perfect travel alarm clock.

## In-depth details and outstanding features

Every innovative product is featured with their own outstanding technical details and below are a list of technical features of the Flip Click Clock:

- powered by in-built 2000 mAh rechargeable battery with USB charging cable included or DC5V plug adapter (not included)
